Logo Printing
on the visitor card

High-speed Portable HD Doc Scanner Supports
Visitor Portrait Capturing + Passport Photo + OCR Recognition

During visitor registration, it supports one-click capture of visitors' portrait image, passport photo and saving, and uses OCR function to automatically read identity document (identity card, passport etc.) and fill in effective information in order to realize quick registration.

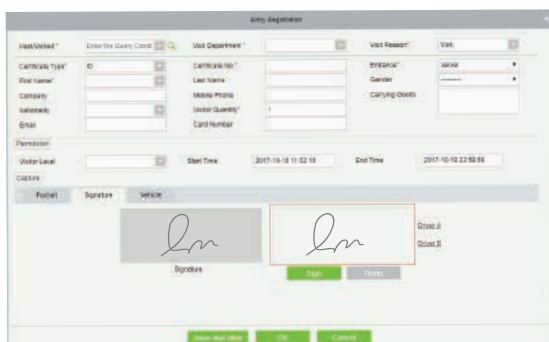

OCR function automatically reads identity document
One-click capture of visitors' portrait image

Supports Connection to Signature Pad and
Auto-Acquisition of Visitors' Signature

Visitor registration points support electronic signature board. During registration, signature records will be automatically saved to visitor system upon successful signature, and printed on customized card printing template, it is also optional to print signatures on visitor cards. After successful visitor registration, visitor cards with printed signature can be instantly printed.

APPROVED

Visitor and Entrance Channel (Flap Barriers etc.) Integration

With the integration of entrance channel and QR code reader, upon successful visitor registration, visitor receipt can be printed by receipt printer, visitor receipt supports customized template setting, including visitor information barcode or QR code to be printed, with these visitors are able to have access to designated areas upon successful verification.

Visitors can present card on the entrance control
Visitors Car Information Management

During visitor registration, it supports registration of visitor car information including brand, license plate, color and model etc.

Watch List Function

Watch lists are categorized into 3 types: Individual, Company, and Country. Monitoring lists can be generated upon needs, for reception convenience. It supports central management through adding new visitors or previous visitor to watch lists, and is able to mark VIP, KEO (Keep an eye on) or blacklisted. During visitor registration, monitoring information in the system will be matched for further operation by registration manager, e.g. special care taking for VIP, and denial of blacklisted access etc. It is able to perform quick search to individual watch list information and editing of setting.

Monitoring Information

VIP	Blacklist	KEO (KEEP An Eye On)

Monitoring lists

Individual	Company	Country

E-mail and SMS Notification Functions

During visitor registration, in case of overtime visits, visitor registration, overtime visitor registration, visitor checking out, monitoring lists, the system will deliver e-mail or SMS notification to visitors, recipients or managers in registration points. SMS and e-mail templates supports customization, templates with different contents, delivery rules and recipients according to conditions can be customized. If it is set to deliver in day of visit, all notifications will be delivered to the specific recipients on specific time.

If there is an overtime visits, the system will deliver e-mail or SMS notification to visitors, recipients or managers in registration points

Visitor + Access Contrl + Elevator Control (Standard or DCS Integration) + Video Linkage One-stop Solutions

ZKBioSecurity3.0 is the ultimate "All in One" web based security platform developed by ZKTeco. It contains many integrated modules: access control, elevator control, video linkage, visitor management, parking system etc. It provides the most advanced solution for a whole new user experience.

Access Control   **Entrance Control**   **Elevator Control**   **Video Linkage**
Global Linkage - Monitoring Video Pop-up

The security linkage system comprises a video monitoring system, when there is an exceptional event, including a swiping of an unauthorized card on the card reader, monitoring video will pop up to warn administrator. Video length could be up to 180 seconds.

Video POP UP

This video appears in the lower part of the ZKBioSecurity software when an unauthorized card is swiped on the card reader.

Integrated Elevator Control (DCS) Solution

By integrating our turnstile solutions with our normal and destination based dispatching elevator control system, you will benefit from consistent design, flexible personalization features, and enhanced comfort for visitors and tenants.

1 Present card on the entrance control

2 Present card on the elevator

Destination

4 Elevator will go upward/ download to the destination

3 Enter the elevator

Elevator Operation Limitation by Timeslots

ZKTeco Elevator Control is able to limit elevators' operation in specific time. For actual implementation, if the elevator control was set to stop operating to go upward between 9:00 p.m. to 7:00 a.m., Unauthorized persons will only be allowed to go downward even with cards for Door access.

**9:00pm - 7:00am

## All In One Web Based Security Management Solution

HTTPs Web Security Protocol

Accurate Check for Innate Location

Precise Real Time Monitoring

Video Surveillance Module
(Fully Supports HIK Vision/ Dahua and ONVIF)

Jail Location E-map

(Adjustable)

Elevator Control

Access Control Linkage With Multi Modules

(Video Surveillance, Alarm, Elevator)

Full Functioned Visitor Module

ZKBioSecurity

HTTPs Web Security Protocol

- SSL/ TLS every Encypteel
- Prevents eavesdroppings and man-in-middle attacks
Accurate Check for Innate Location

- Able to check who is inside in particular area
- Check for the last access location

Precise Real Time Monitoring

- Flexible and expandable design
- Remote opening and closing lock down control
- Pop-up alarm notification
- Automatic determines who is/ are inside the specific area
Video Surveillance Module

- Fully Supports ZKTeco, HIKVision and Dahua video surveillance
- Supports ONVIF
- Interactive with access control and elevator system with various output options
- Up to 30sec pre-event recording function

Jail Location E-map (Adjustable)

- Supports multiple floor location display
- Supports device status notification
- Drag and drop layout designing
- Real time monitoring

Elevator Control

- Supports up to 50 Floors
- Supports multiple access authority setting
- Multiple event types can be defined

Access Control Linkage With Multi Modules

- Supports multi module linkage
- Access control, video surveillance and elevators
- Supports more than 100 linkage combinations
- Supports email notification for all events

Full Functioned Visitor Module

- Online Registration
- Supports OCR and USB Camera
- Visitor Time Schedule Setting
- Detailed visitor reports
