- ❖ Temporary staff self-service scanning QR code registration
- ❖ Supports HTTPS protocol

## 2. Function Updates Details

### 2.1 Supports multi-language real-time switching

Convenient for different native speakers to select the corresponding language viewing and operating software, currently supported: English, Spanish, Thai, Spanish, Indonesian, Vietnamese, Simplified Chinese and Traditional Chinese 7 languages real-time switching.

Note:Only after the installation is completed, it can support switching Simplified Chinese viewing software.

## 2.2 Temporary staff self-service scanning QR code registration

Temporary personnel use the mobile phone to scan the QR code to register personnel information, and support uploading their own user photos for visible light facial recognition devices to achieve attendance or door opening functions.

**Temporary Personnel Setting**

Enable Temporary Personnel Auto-audit:  Yes  No

**Self-service Registration**

QR Code URL: <http://192.168.213.191:8098/app/v1/adreg>

[Download QR code image](#)

## 2.3 Supports HTTPS protocol

Supports HTTPS protocol for data security, avoiding the risk of information disclosure and reducing the probability of a website being hijacked
