1. Version Change

Previous Version: ZKBioSecurity 3.0.5.0_R

Current Version: ZKBioSecurity 3.1.0.0_R

2. Key Updates

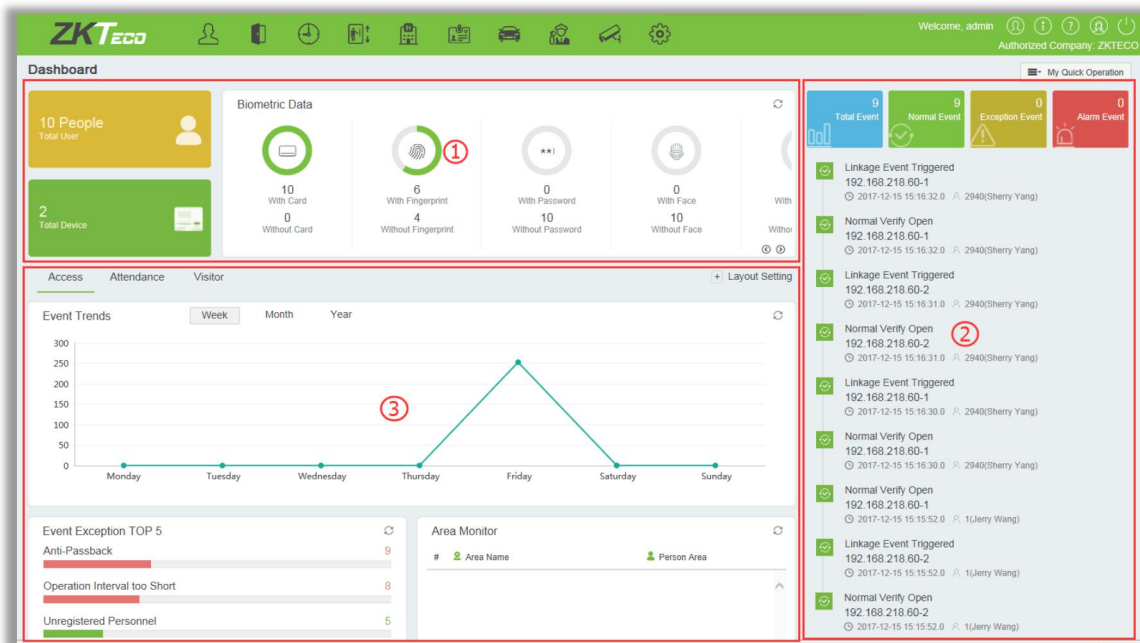

- ❖ Newly designed dashboard to enhance the user experience.
- ❖ Newly added Time & Attendance module in this version of software. Customers who need professional Time & Attendance with Access control solution can get the options in ZKBioSecurity.
- ❖ Newly added Parking module gives overall solution for buildings and factories.
- ❖ Improved Import and Export features in the system.
- ❖ Added more new features for Advanced access control module.
- ❖ Optimized system performance, reducing the usage of the memory (nearly 100MB).

3. Update Details

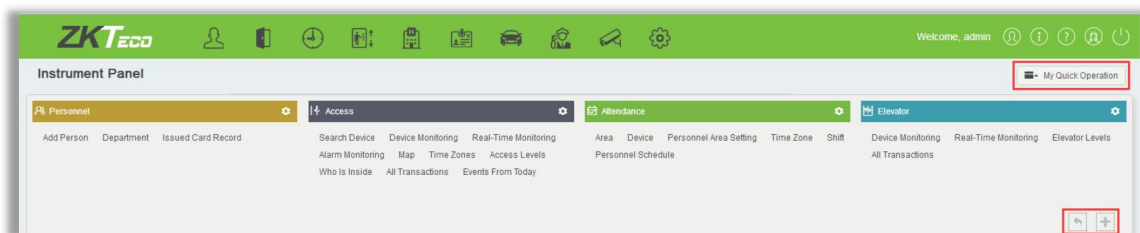

3.1 Platform

1. Redesigned more intelligent dashboard

The new dashboard is mainly divided into three parts, **the first part** shows the total number of personnel, devices and biometric templates in the system; **the second part** shows the total number of events including all events, normal events, exception events, alarm events and dynamic display of real-time monitoring data; **the third part** is the data statistical analysis for access control, time attendance, visitor module. For example, for access control module, you can view the event trends, the top five exception events, statistical results of area monitoring. At the same time, for different modules, users can quickly view the statistics by customizing the layout settings.

Also, the previous quick operation has been moved to the new menu [My Quick Operation]. You can customize the operations as per your requirements.

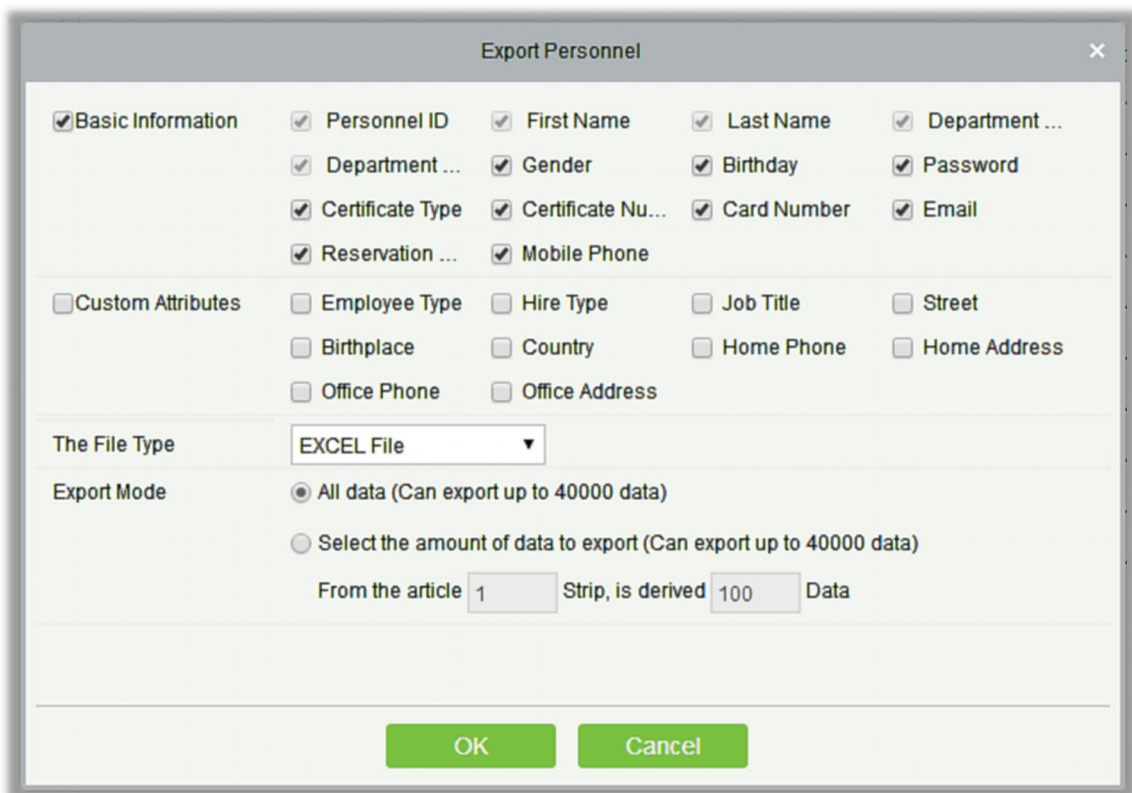

- The module name in the main menu can now also be displayed in icon style. When there is no enough space to show the text in the menu, the system will show the icon automatically. You can configure to show in icon style only in the [System]→[Parameters] menu.

- The standard version of the software has limited number of personnel/department/area quantity. Please refer to the new price list to see the limitation.
- Optimized system performance, reducing the usage of the memory (nearly 100MB).

3.2 Personnel

- It supports more flexible import/export function of personnel and department. For example, the personnel module includes three types of export, "Export Personnel", "Export Biometric Template" and "Download Personnel Import Template". Now, user can select the required basic information and custom attributes to export.

Export Personnel

☒ Basic Information

☒ Personnel ID ☒ First Name ☒ Last Name ☒ Department ...

☒ Department ... ☒ Gender ☒ Birthday ☒ Password

☒ Certificate Type ☒ Certificate Nu... ☒ Card Number ☒ Email

☒ Reservation ... ☒ Mobile Phone

☐ Custom Attributes

☐ Employee Type ☐ Hire Type ☐ Job Title ☐ Street

☐ Birthplace ☐ Country ☐ Home Phone ☐ Home Address

☐ Office Phone ☐ Office Address

The File Type: EXCEL File

Export Mode: ☒ All data (Can export up to 40000 data)

☐ Select the amount of data to export (Can export up to 40000 data)

From the article 1 Strip, is derived 100 Data

OK Cancel

2. Modified a limitation where older version doesn't support configuring duplicate department names. The department with same name must have different parent department.

Department Number	Department Name	Parent Department Number	Parent Department	Created Date	Operations
5	Marketing Department	3	Development Department	2017-09-05 13:51:19	Edit Delete
1	General			2017-09-02 13:54:06	Edit Delete
hotel	Hotel			2017-09-02 13:54:09	Edit Delete
4	Financial Department	1	General	2017-09-02 13:54:06	Edit Delete
2	Marketing Department	1	General	2017-09-02 13:54:06	Edit Delete
3	Development Department	1	General	2017-09-02 13:54:06	Edit Delete

3.3 Access Control

Added more Advanced Access control features. Users can customize the global Anti-Passback rules for different people, and also support setting "person availability" to define the valid dates and times for different people, which is very useful especially when used together with the turnstiles/barriers. Users can also export the [Who is inside] report from this version.

1. Global Anti-Passback now support setting rule applicability by personnel. User can select apply to "All Personnel", "Just Selected Personnel", and "Exclude Selected Personnel".

- Added person availability feature. There are three modes to set up; Valid Data, After the first use of valid days, and Use number of times.

- Supports exporting [Who is inside] report in EXCEL, PDF, CSV format, including area name, number of personnel, personnel information in area.

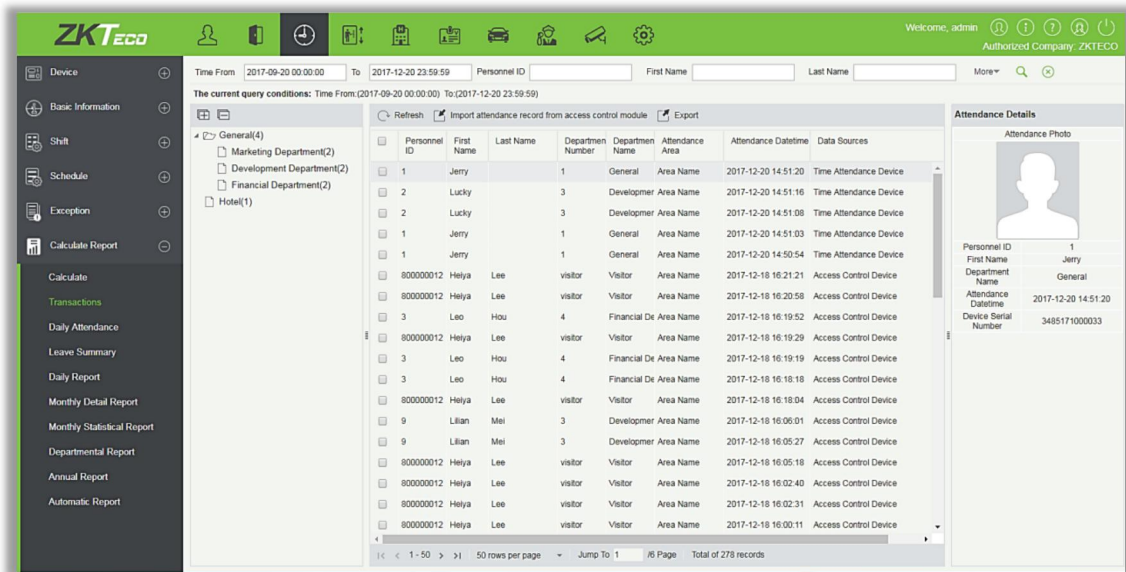

The screenshot shows the ZKTeco software interface. On the left is a sidebar with navigation options: Access Device, Access Control, Advanced Functions, Zone, Reader Define, Who Is Inside, Global Anti-Passback, Global Linkage, Global Interlock Group, Global Interlock, Person Availability, and LED Data. The main area displays a table of personnel data. At the top, there are search filters for Personnel ID, First Name, and Last Name. Below these are buttons for Refresh, Delete Personnel, and Export (highlighted with a red box). The table has columns for Personnel ID, First Name, Last Name, Department, Card Number, Last Access Time, and Last Access Reader. The data is filtered to show 10 records.

3.4 Time & Attendance

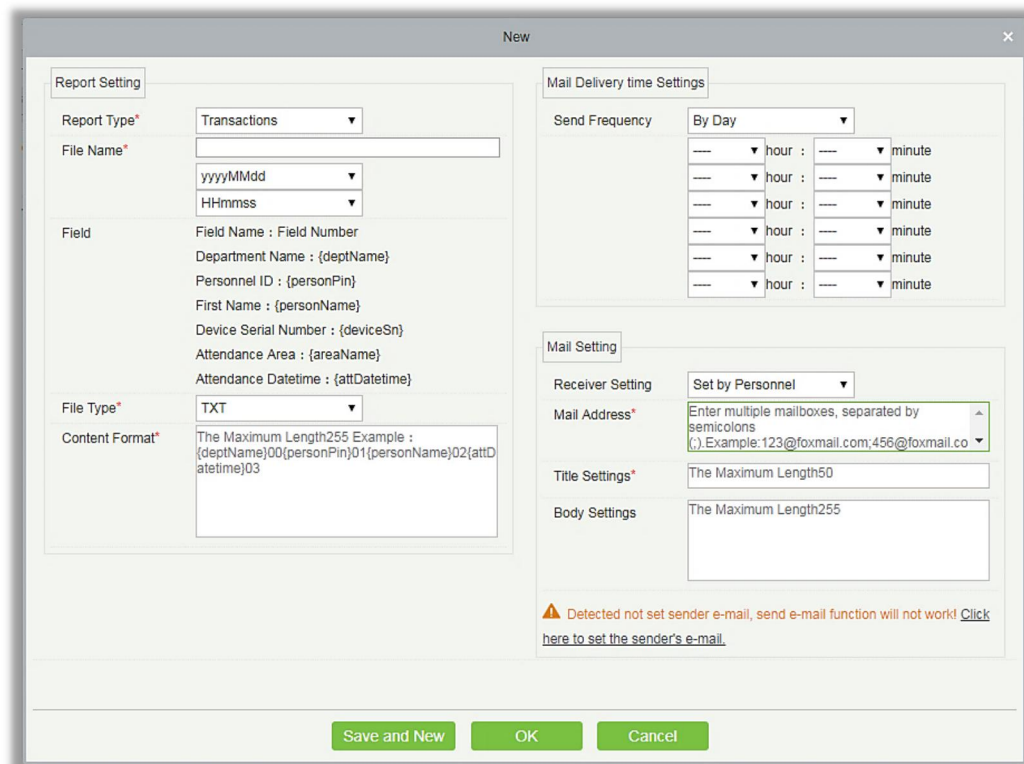

Added Time & Attendance module. The new version of the software has integrated T&A module with the other modules like Access Control or Elevator Control etc. So, the user who wants the privilege to use T&A with other modules also, then they can use this software. We provide this more powerful overall solution to avoid using two or more separate software for end user. This module can support time attendance device like G1/G2/G3.

1. Supports the attendance point set up feature. Access control module and parking module can be chosen here as the attendance point, and their records will be used for the original T&A calculation. **This new feature is controlled only when the software is licensed.**

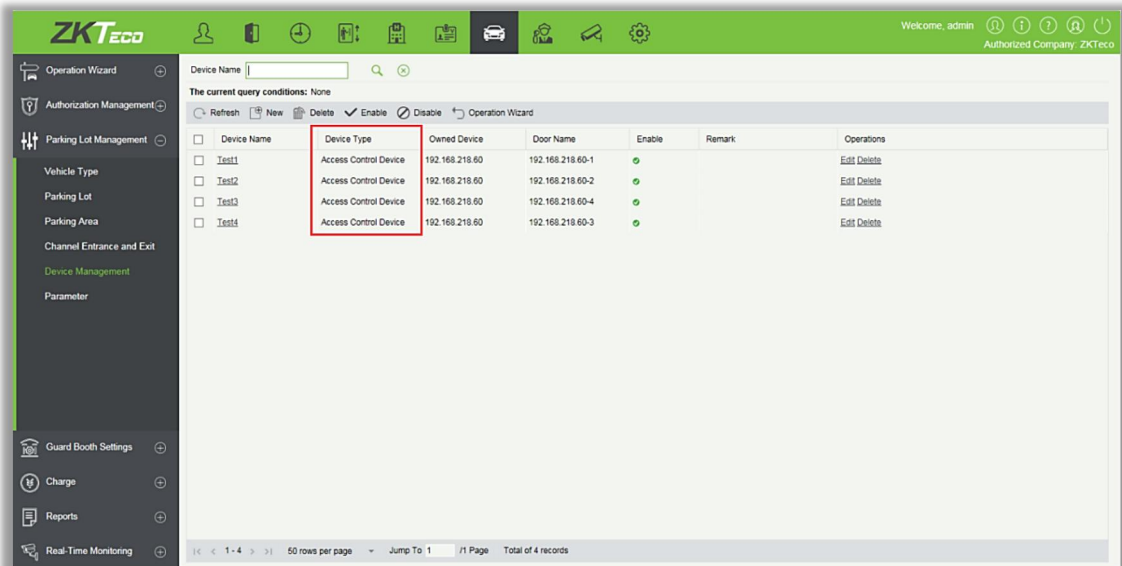

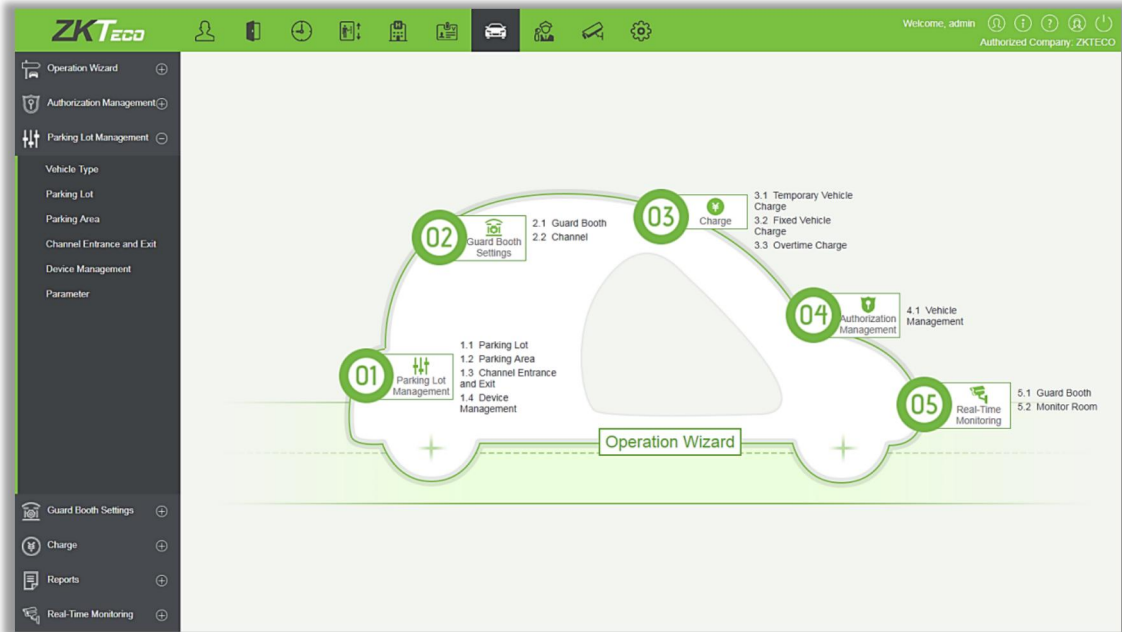

2. Supports automatic report feature, which allows you to customize attendance reports and send them to designated areas or departments on a regular basis.

3.5 Parking

1. Added Parking module. The Parking module supports two modes, license plate recognition and using access control as parking control. Users can effectively manage the vehicle's entry and exit using the LPR Camera or UHF or BT readers. Software provides the powerful parking charging modes and real-time monitoring of customers. Supports ZKTeco LPRC100 camera, which can be used in **Thailand/Argentina/Mexico** currently. We will update the list of supported countries in the future. In addition, **UHF and Bluetooth reader together with the InBio Pro panels** is also supported for the parking application in **all countries**.

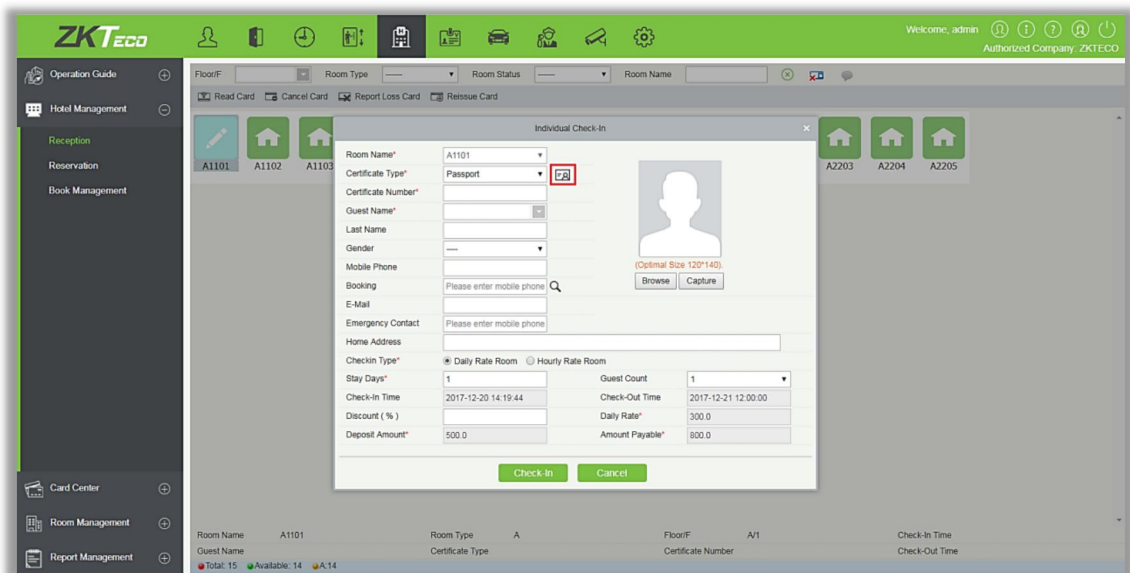

3.6 Visitor Management

- Updated OCR Features now supports more Countries. Chile supports fully for ID card. Following countries are in possibility list: UAE/Mexico/Argentina/Spain/Peru/UK, for passport support all countries.

*We have already finished more visitor management features which have included it in another individual package. The new features include the signature pad/SMS/Watch list etc. If you need these features, please contact our sales people. We will release this package in the future version.

3.7 Hotel Management

Added OCR and ID Reader feature. Software supports using OCR or ID reader to recognize the guest's information in Hotel Module. By using these two features, we can obtain information from the ID card or passport and auto-fill to the personnel column. This new feature is controlled only when the software is licensed.
