

ZKBioSecurity3.0 Access Control Hardware selection guide

We will release new products, inBio Pro. There are three models in this new series, inBio160 Pro, inBio260 Pro, inBio460 Pro.

You can use ZKBioSecurity3.0 to manage the existing controller C3 and inBIO. But in some application, you have to use the new inBio Pro to achieve some new features. Please check the form below.

Module	Device	Picture	Reason to choose
Access Control	Inbio160 Pro; Inbio260 Pro; Inbio460 Pro.		<ol style="list-style-type: none"> 1. Use advanced access control functions; 2. The project has more than 50 access control devices; 3. Manage devices in WAN.
	C3-100; C3-200; C3-400 Inbio160; Inbio260; Inbio460	 	<ol style="list-style-type: none"> 1. Don't use advances access control functions; 2. The project has less than 50 access control devices; 3. Manage devices only in LAN.
