

LPRC200

New License Plate Recognition Camera
with a Dual-core Processor for Outstanding Performance

LPRC200 is the new intelligent license plate recognition camera that supports license plate recognition and can identify a vehicle's color, brand, and type. Compared with LPRC100, LPRC200 has higher performance in recognizing speed and accuracy due to its dual-core processor.

With embedded vehicle access software, LPRC200 supports offline operation. LPRC200 can work independently after being imported allowlist and blocklist data via a web browser, which usually applies in monthly parking management, especially under scenarios like the factory, governmental building, residential area, etc.
