Product Overview

ZKBio Sense series active deterrence IP cameras are the front-end cameras of intelligent video surveillance solution released by ZKTeco based on the Deep-Learning algorithm and Computer Vision technology.

Using an advanced and powerful CPU, coupled with the embedded intelligent classification algorithm, ZKBio Sense series active deterrence IP cameras can accurately detect and recognize 3 key types of targets: humans, vehicles and objects. Meanwhile, they can effectively filter out objects to avoid false alarms. More importantly, the series IP cameras feature smart hybrid light, red / blue strobe light, and audio alert to provide an active deterrent warning.

ZKBio Sense series active deterrence IP cameras greatly improve the efficiency and safety of the entire video surveillance system, which can be widely used in different scenarios, such as smart school, office, industrial park, community, etc.

Core Features

Active Deterrence

ZKBio Sense series active deterrence IP cameras support active deterrence with built-in strobe light and speaker to warn intruders off. With the smart hybrid light, ZKBio Sense IP Cameras offer colorful video images for alarm triggering events.

IVA (Intelligent Video Analytics)

ZKBio Sense series active deterrence IP cameras support multiple intelligent video analytic functions: Target Counting, Object Lost/Left, Line Crossing, Area Detection, and Smart Motion Detection, which are based on human and vehicle targets classification.

H.265 HEVC

H.265 is an evolutionary optimization of the traditional H.264, it includes a series of encoding strategy such as ROI, smart 2D/3D noise reduction, etc. Delivering high quality video with up to 70% lower bandwidth.

True WDR

Powered by ZKTeco's powerful ISP algorithm and high-quality sensor, ZKBio Sense series active deterrence IP cameras are built-in with true WDR feature, which can present excellent picture images in extreme contrast lighting environments.

ANR

When the network between ZKBio Sense series active deterrence IP cameras and ZKBio Sense series NVRs is interrupted, videos can be automatically saved on the SD card of the front end, and then uploaded to the back end after the network is restored, so as to avoid video loss.

Protection

With precise mechanical and rugged metal casing design, ZKBio Sense series active deterrence IP cameras can stand against water and dust with IP67 protection rating, and support to work in various harsh outdoor environments such as temperature range -30 °C to +60 °C, etc.
