About the Company

ZKTeco is one of the world's largest manufacturer of RFID and Biometric (Fingerprint, Facial, Finger-vein) readers. Product offerings include Access Control readers and panels, Near & Far-range Facial Recognition Cameras, Elevator/Floor access controllers, Turnstiles, License Plate Recognition (LPR) gate controllers and Consumer products including battery-operated fingerprint and face-reader door locks. Our security solutions are multi-lingual and localized in over 18 different languages. At the ZKTeco state-of-the-art 700,000 square foot ISO9001-certified manufacturing facility, we control manufacturing, product design, component assembly, and logistics/shipping, all under one roof.

The founders of ZKTeco have been determined for independent research and development of biometric verification procedures and the productization of biometric verification SDK, which was initially widely applied in PC security and identity authentication fields. With the continuous enhancement of the development and plenty of market applications, the team has gradually constructed an identity authentication ecosystem and smart security ecosystem, which are based on biometric verification techniques. With years of experience in the industrialization of biometric verifications, ZKTeco was officially established in 2007 and now has been one of the globally leading enterprises in the biometric verification industry owning various patents and being selected as the National High-tech Enterprise for 6 consecutive years. Its products are protected by intellectual property rights.

About the Manual

This manual introduces the operations of **ZK-IWBP Conference Tablet**.

All figures displayed are for illustration purposes only. Figures in this manual may not be exactly consistent with the actual products.

Document Conventions

Conventions used in this manual are listed below:

1 Whiteboard Writing

1.1 What is a Whiteboard?

Whiteboard is a multi-functional writing tool that helps users communicate and interact more effectively, provides a comfortable and pleasant experience, and improves team effectiveness. On the homepage, click the **Whiteboard** application button, then after the meeting, scan the code to remove the whiteboard content. The meeting's main goal is to not miss it again.

1.2 Create Content

• Open Whiteboard

From the homepage of the conference tablet, click the **Whiteboard** application button to open the whiteboard.

1.3 Share Content

Scan QR Code to Share

Scan the QR code and take it: The QR code sharing page will appear when you click the **Sharing** button in the lower left toolbar. According to the text instruction, scan the QR code with your mobile phone to access the file link and then save the file.

1.4 File Function

• File Open

To open the file operation page, click the **File** button in the lower left toolbar. According to the text prompt, you can access the whiteboard folder to pick the whiteboard file to open. The MHB file format is used for the whiteboard file.

• File Save

To access the file operation page, click the **File** button in the lower left toolbar. You can save the content of the whiteboard according to the text prompt. The save path might be local storage on the whiteboard or transferred onto a USB auxiliary device. MHB, PDF, and JPG are all possible to save formats.

1.5 Whiteboard Settings

Whiteboard Settings

To access the whiteboard setting operation page, click the **Settings** button in the lower left toolbar.

• Writing Settings

Turn on/off settings for pen tip writing, chart drawing, and two-color pen functions by clicking the **Writing** button. When you switch on the pen tip effect on infrared touch devices, it will appear. It is enabled by default, and the user selection is not modified when the system is restarted. To access the whiteboard setting operation page, click the **Settings** button in the lower left toolbar.

- 1. **Multiplayer writing:** Turn on the switch to enable automated recognition of writing graphics. It is closed by default, and the default choices are restored after restarting.
- 2. Dual colour stylus writing: The two-color pen feature is enabled in the case of the infrared touch screen, and the two-color pen can be used for writing by many people, as well as the color of the pen tip and finger is defined separately. It is enabled by default, and the user selection is not modified when the system restarts.

Writing Background

Click the **Background** button to choose different writing backgrounds.

Scan Code Network

Click Scan Code to change the QR code sharing network conditions.

- 1. **QR Code Generated via Cloud server:** Both mobile phones and conference tablets need to be connected to the Internet to obtain the sharing link.
- 2. **LAN Mode:** The mobile phone and conference tablet need to be connected to the same local area network to obtain the sharing link.

About

- 1. View the current whiteboard version number.
- 2. View software license agreement.
- 3. View software update, automatic update or manual update can be set.

2 Annotation

2.1 What are the Comments?

The annotation function allows users to write content and make annotations on the current screen.

2.2 How to Start Annotating

Function Entry

Comments can be entered in the following scenarios:

1. **Scenario 1**: The comment toolbar will appear whether the PPT is played locally or through the screen. At this time, click the **Comment** button to add your remark.

Note: If you still have a page-turning button after adding the comment in some versions of PowerPoint, you can see the comment along the page at this time.

2. **Scenario 2**: In other cases, the **Comment** button in the sidebar, click to enter the frozen screen comment.

3 Small Blackboard

3.1 What is a Small Blackboard?

The small blackboard is a floating writing board that can be called up in any interface for temporary writing.

3.2 How to use the Small Blackboard

• Evoke the Little Blackboard

Pull up from the bottom of the conference tablet to evoke the small blackboard. **Note:** Cannot be used with frozen screen annotation or full-screen whiteboarding.

• Put Away the Small Blackboard

There are two ways to put away the small blackboard:

Method 1: Click the Collapse button on the bottom toolbar to hide it.

Method 2: Press and hold with multiple fingers and shake it down quickly.

• Small Blackboard Use

4 Wireless Screen Transmission

4.1 What is Wireless Screen Transmission?

Wireless screen transmission can project the screens of laptops, mobile phones, and other devices to the conference tablet and present them to the audience without the need for wires.

4.2 How to Transfer a Screen from a Computer?

How to use computer screen transfer assistant software to transfer screen?

1. Please download the computer screen transfer assistant at https://www.meeting-vip.com/share/ in advance.

2. Find the wireless screen transfer and open the wireless screen transfer application on the conference tablet.

3. After opening it, you can see the wireless screen transfer guide and find the screen transfer code.

3. After setting the password, you need to enter the correct password every time you wake up on the smart conference tablet.

6.11 Eye Protection Gadget

- 1. Click the 📮 icon in the sidebar.
- 2. Click the Eye Care switch to open the eye protection tool.

 The screen becomes warmer, enter the eye protection mode, click the Eye Care switch again to close the eye protection mode, and the image mode returns to the previous state.

7 Beginner's Guide

How to Start a Meeting?

- Turn on the conference tablet: Make sure that the power is turned on, that the power switch at the location where the power cord is attached to the conference tablet is turned on, and that the power button indication lights up before short pressing the power button to begin.
- 2. Eliminate the typical water-based pens and whiteboards in favor of the whiteboard software, which allows you to freely create and amend meeting information. Start the whiteboard method: From the meeting tablet's homepage, click the **Whiteboard** icon to open the whiteboard.

• Wireless Screen Transfer

Wireless screen casting supports using computer screen transfer assistant software and mobile phone screen casting.

Welcome Interface

Use the welcome interface App to turn the conference tablet into a welcome display screen.

1. Swipe left on the homepage to enter the welcome interface.

Interface Introduction: The main interface of the WEB version welcome screen is shown below, and it includes the following elements: backdrop picture, welcome copy, show start button, and toolbar.

2. Toolbar:

- a) Click the 王 button to enter the current welcome interface's elements.
- b) Click the 🗊 button to select an alternative welcome interface template.
- c) Click the = button to input an alternate or local audio file into the welcome interface.
- d) Press the 🔿 button to return the welcome interface to its initial state.
- 3. Edit Display Content:

- a) Click the text on the main interface, and the editing toolbar will appear.
- b) To control the reduction and enlargement of the text font size, use the A or A buttons.

- c) To control the bolding and cancel the bolding of the text, click the B button.
- d) Click the ^C button to bring up a color selection pop-up window where you can choose the text color.
- e) Switch between centering, left-aligning, and right-aligning by clicking the \equiv button.
- Press and hold the small dot on the corner of the text box to drag and modify the size of the text box.
- g) Click the 💼 button in the top right corner of the text box to delete the text box.
- h) Press and hold any place in the text box, then drag to move it.
- 4. Display of Results:

After modifying the elements of the welcome interface, enter the full-screen display mode by clicking the **Start to display** button on the main interface.

Note: In the current version, if you do not touch the screen in the display state for more than 5 seconds, the setting button is automatically hidden, and the quick setting button is immediately displayed when you touch the screen to guarantee that the pure display of the screen.

When you click the button in the lower left corner of the interface, it will return to the editable state.
